Carbide Burs

DHP Carbide Burs exceed stringent manufacturing guidelines and requirements of the ISO, FDA and ADA for strength, performance and durability. The manufacturing process combines the proper selection of tungsten carbide and high-quality steel with a specialized heat treatment process and controlled welding operation to obtain maximum strength and durability. This line of carbide burs adheres to strict tolerances for concentricity of the stainless-steel shank during manufacturing for a well-balanced bur that delivers minimal vibration. The blades are made of fine grain tungsten carbide to remain sharp and wear longer.

This color guide applies to all DHP diamonds.

Single-Use Diamonds

25/box

\$39.25

DHP Diamonds have uniform diamond distribution for fast, consistent cutting. High-grade stainless steel shanks are resistant to corrosion during the sterilization process. True concentricity produces no noticeable chatter or vibration. Color coded to identify the diamond's grit. Packaged in blister packs of 5 diamonds. Non-Sterile.

NanoHybrid Flowable Light Cure Composite

DHP's NanoHybrid Flowable Light Cure Composite is a low viscosity, resin-based flowable composite with high radiopaque features. It is recommended for direct restorations as well as for repair of composite and ceramic veneers. Formulated with nano particles for higher strength, polishability and wear resistance. Fluoride releasing.

Air Water Syringe Tips

These disposable tips have an inner core (unless otherwise noted) water chamber that seats into the syringe, eliminating water contamination in the air chamber. The unique quad core design ensures instant dry air, prevents cross contamination and delivers superior air/water spray. Features an o-ring groove that locks tip for patient safety and eliminates leakage.

Biological Monitoring System

This mail-in Biological Monitoring System involves the use of bacterial spore test strips for measuring the effectiveness of steam, dry heat, chemical vapor and ethylene oxide gas sterilization processes. The CDC guidelines recommend weekly monitoring of all practice autoclaves. These test strips also provide an effective way to biologically monitor both mechanical function and operator technique for steam and dry heat sterilizers. Postage is not prepaid.

Fluoride Varnish

Recommended for the treatment of dentinal hypersensitivity and for the reduction of postoperative sensitivity. 5% sodium fluoride; less fluoride than with conventional treatments. It dries clear on tooth surfaces, provides immediate and long lasting results, is gluten-free and sweetened with xylitol. Comes in a single dose, 0.5ml, package with a micro-applicator creating an easy one-step paint-on process. Each application is sealed until ready for use. Patient Instructions are included to distribute after each application.

Fluoride Trays

Rigid, yet flexible enough to adapt to the contour of all arches and teeth. Trays are color-coded for easier size identification. The dual arch tray features a unique hinge design for extra convenience in "folding over" the tray.

| Single Arch | | Dual Arch | |
|---------------------------|----------------|----------------|----------------|
| Small - Yellow | 950-10050 | Child - Green | 950-10053 |
| Medium - White | 950-10051 | Small - Yellow | 950-10054 |

Surgical Sutures

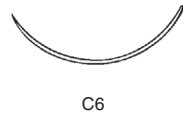

Made of high-quality absorbable and non-absorbable suture material to provide superior wound closure. The extra sharp cutting edges reduce tissue drag and allow precise, smooth penetration through tissue. Sterile.

Use with DHP Needle Holders. See page 39.
